

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	12 October 2022
Team ID	PNT2022TMID04551
Project Name	Signs with smart connectivity for better road safety
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	<u>USER REGISTRATION</u>	<ul style="list-style-type: none">• Through google forms• Through mail• Through linkedin• Through facebook
FR-2	<u>USER CONFIRMATION</u>	<ul style="list-style-type: none">• Through verification mails• Through OTP
FR-3	<u>USER APPROVAL</u>	<ul style="list-style-type: none">• Through mails• Through phone calls• Through SMS
FR-4	<u>USER TRANSACTION</u>	<ul style="list-style-type: none">• Through net banking• Through UPI
FR-5	<u>TESTING</u>	<ul style="list-style-type: none">• Testing through components• Testing through API and UI
FR-6	<u>END RESULT</u>	<ul style="list-style-type: none">• End result through product features• By using the technology

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
--------	----------------------------	-------------

NFR-1	Usability	<ul style="list-style-type: none"> • Situations never remain the same. Therefore there must be a constant check of the conditions prevailing and accordingly there must be changes made in these boards. • Sign boards with caution or alerts must be placed well in advance so that the drivers could be more alert with the journey. • The text content must be available in different languages to help the drivers. • Boards must be large and clear for better visibility.
-------	------------------	---

		<ul style="list-style-type: none"> • Sign boards should be bright coloured so that it catches the drivers' sight. • The illustrations or the symbols used in the boards must be easily understandable.
NFR-2	Security	<ul style="list-style-type: none"> • The security system should be strong enough that no one can modify it other than the authority. • No one should be able to enter into the network to change, delete or manage the intimations or messages delivered through the sign boards.
NFR-3	Reliability	<ul style="list-style-type: none"> • There should not be any miscommunications or confusions regarding the messages displayed. • Maximum accuracy must be ensured. • All the information displayed must be checked periodically and updated if any changes are needed for error-free intimation.
NFR-4	Performance	<ul style="list-style-type: none"> • The efficiency and the accuracy of the information hence calculated should be maximum. • It should be ensured that minimum amount of energy, time and cost is required for the operation.
NFR-5	Availability	<ul style="list-style-type: none"> • These should be available anytime and everywhere that is 24/7. • Sign boards should be located in places which have direct view from the road. It should not be present amidst bushes, trees, buildings etc. • It should be properly monitored that no sign boards are damaged, repaired or malfunctioning at any time. • The sign boards should be made available only in places where they are required the most. Frequent availability of boards may lead to confusion and mistakes.

NFR-6	Scalability	<ul style="list-style-type: none"> • It should be easy to scale according to the requirement. • It should be in such a way that the network at any time of period should be ready to be expanded and implemented on a wider scale.
-------	--------------------	--
